

Seungeun Lee, PhD

Founder & Principal Consultant · Dr. S Lee Life Sciences

Rigor IN SCIENCE.

Clarity IN STRATEGY.

Netherlands · seungeun@drsleelifesciences.com · home.drsleelifesciences.com · linkedin.com/in/seungeunlee-phd

Scientist who codes and speaks the domain vocabulary. Fifteen years across research benches, regulatory bodies, and commercial partnership, with trusted life-science networks across Europe and Korea. Independent practice serving consulting firms, expert networks, and research organizations across EMEA and Asia.

Current threads: **Senior Advisory** (verification and validation on advisory mandates, open across engagement levels and contract types) and **Agentic AI** (Sense 2026, an agentic AI workspace by a life-sciences scientist, on active build).

EXPERIENCE

2026 – Present · Netherlands

Founder & Principal Consultant

Dr. S Lee Life Sciences

Commercial strategy & partnerships: Europe–Asia go-to-market and partnership development for biotech. Market sizing, ICP definition, pricing, channel and stakeholder strategy. Sales-operations analysis. Multidisciplinary leadership across sales, project management, lab, and bioinformatics.

Technical & scientific advisory: R&D support across clinical, environmental, food-safety life-sciences. NGS workflow design (in vivo, in vitro, in silico), method validation, proficiency testing, bioinformatics pipelines (Python, R, Docker). Peer-reviewed manuscripts, technical reports, regulatory documentation.

Digital infrastructure: Database architecture, LIMS, biobank, sales-operations, reporting; ISO 17025/9001 documentation. Platform-flexible: Python, R, SAP, Power BI, SharePoint. Agentic AI workspace design (active build: Sense 2026).

2026 – May 2026 · Rotterdam

Entrepreneur in Residence

Advisors

Domain research, ICP definition, and customer development for an early-stage AI SaaS. Structured interviews with scientific, commercial, and operations leaders across global R&D and biotech, surfacing buyer dynamics and market entry mechanisms.

2021 – Feb 2026 · Amsterdam

Senior Project Manager · Head of Project Management

Progen Europe B.V.

Business development: EMEA commercialization of scientific innovations; B2B/B2C partnerships, pricing and branding strategies.

Technical engagement: Advised on workflow trade-offs across in vitro and in silico methods; led proficiency testing, validation reporting, data pipeline design.

Financial planning: Fiscal planning, revenue forecasting, pricing optimization; reporting infrastructure with SAP, Power BI.

Digital infrastructure: Organization-wide ISO 17025/9001 systems and LIMS workflows.

Leadership: Multidisciplinary teams across sales, project management, lab operations, and bioinformatics.

2017 – Jan 2021 · Wageningen

Senior Researcher Genomics · Data Scientist

Wageningen Food Safety Research (WFSR / NVWA)

Data analysis: Genomic data analysis of food-borne pathogenic microbes using Illumina and Nanopore sequencing, with Python, R, Docker, Ubuntu, Git workflows.

Database management: Developed biobank database infrastructure using LIMS, RDBMS (Microsoft Access), Jupyter Notebook, Python.

2016 – Oct 2016 · Bilthoven

Post Researcher

RIAM (Netherlands Environmental Assessment Agency)

Curated metadata to refine the GLOBIO-Aquatic Projection model. Applied R packages, built regression models, aligned datasets through variable analysis.

02 EDUCATION

2016

PhD, Public Health

Seoul National University

2013

MSc, Molecular Medicine and Biopharmaceutical Science

Seoul National University

2011

BSc, Food and Nutrition

BSc, Biology

Yonsei University

03 SKILLS

- Commercial strategy
- Technical & scientific advisory
- Digital infrastructure
- Agentic AI & LLM adoption
- Training & education
- Cross-functional leadership

04 CERTIFICATIONS

- PRINCE2 7 Practitioner
- ISO 17025 Awareness & Auditing
- IATA Dangerous Goods Regulation
- Big Data Insight
- Linux for Biologists

05 LANGUAGES

- **Korean:** native
- **English:** professional
- **Dutch:** conversational

2013 – Feb 2016 · Seoul

Student Researcher

Environmental Health Engineering Lab, Seoul National University

Built a new laboratory from the ground up to optimize in vitro and in silico workflows. Refined NGS biological sequence data with bioinformatics tools to identify environmental pathogens and improve microbial molecular identification.

2011 – Feb 2013 · Seoul

Student Researcher

Endocrine Research Center for Diabetes and Endocrine Disease, SNU Hospital

Molecular-based medical analyses: cell culture, differentiation, drug treatments, animal handling, PCR, bioluminescent assays, immunoblotting, protein extraction, DNA cloning.

2009 – Dec 2009 · Davis, USA

Research Assistant

Northern Human Nutrition Research Center, USDA, UC Davis

Handled essential laboratory equipment, chemicals, and animal models for nutrition and health research applications.
